

## BlueSphere Consulting (PTY) LTD

Marine & Environmental GIS Consulting

Turning spatial data into action for conservation, planning, and sustainability

### Who We Are

BlueSphere Consulting is a GIS consulting company specialising in marine and environmental spatial analysis. Founded and led by a professional GIS Analyst, BlueSphere supports organisations working in conservation, research, and sustainability by delivering clear, decision-ready spatial products.

We work at the intersection of science, spatial data, and real-world action, helping teams move from insight to implementation.

### What We Do

We provide flexible, project-based and ongoing GIS support tailored to conservation and environmental needs.

### Core Services

Marine habitat mapping (seagrass, coral, benthic habitats)

Marine Protected Area (MPA) spatial analysis and zonation support

Environmental and ecological spatial assessments

Spatial planning and decision-support analysis

Species distribution and spatial trend analysis

Interactive maps, dashboards, and web-based visualisations

Data cleaning, analysis, and cartographic design

GIS support for reports, proposals, and publications

## How We Add Value

Marine-focused expertise with strong environmental context  
Action-oriented outputs that support implementation and management  
Clear, communicative mapping for both technical and non-technical audiences  
Flexible engagement models – short-term, project-based, or ongoing support

## Who We Work With

Marine and environmental NGOs  
Conservation trusts and research institutions  
Environmental and coastal consultancies  
Government and planning authorities  
ESG and sustainability teams  
Academic and grant-funded research projects

## Our Approach

We believe effective conservation requires more than data.

We:

Discover through research and spatial analysis  
Translate complexity into clarity  
Support informed decisions and practical action  
Take responsibility for the environments we help protect

## Let's Work Together

If you're looking for reliable, conservation-focused GIS support, BlueSphere Consulting would love to collaborate.
